6.27 SOURCEWATER PROTECTION AREAS

(Added by By-Law 60-2021)

## 6.27.1 IDENTIFICATION OF SOURCE PROTECTION AREAS

The Source Protection Overlays (SP1 and SP2), shown on Schedule "A" of this Zoning Bylaw, identify the portions of the *Wellhead Protection Areas (WHPAs)* associated with the County's municipal drinking water supply wells where a drinking water threat, as prescribed by the *Clean Water Act, 2006*, can be a significant drinking water threat. The mapping of these areas in this Zoning By-Law reflects the WHPA mapping contained in the applicable Source Protection Plans, approved under the *Clean Water Act, 2006*.

The Source Protection Overlay 1 (SP1) applies to the portion of the WHPA closest to the wellhead, where the majority of the prescribed *significant drinking water threats* can occur. The Source Protection Overlay 2 (SP2) applies to the remainder of the WHPA, where only certain chemical and waste related *significant drinking water threats* can generally occur.

## 6.27.2 PRESCRIBED DRINKING WATER THREATS

A list of drinking water threats, as prescribed under the *Clean Water Act, 2006*, is provided below for information purposes:

August/21

(Added by By-Law 60-2021)

- waste disposal sites within the meaning of Part V of the Environmental Protection Act;
- the establishment, operation or maintenance of a system that collects, stores, transmits, treats or disposes of sewage;
- the application of agricultural source material to land;
- the storage and/or management of agricultural source material;
- the application of non-agricultural source material to land;

- the handling and storage of a dense non-aqueous phase liquid;
- the handling and storage of an organic solvent;
- the management of runoff that contains chemicals used in the de-icing of aircraft;
- an activity that takes water from an aquifer or a surface water body without returning the water taken to the same aquifer or surface water body;
- an activity that reduces the recharge of an aquifer; and
- the use of land as livestock grazing or pasturing land, an outdoor confinement area or farm-animal yard.

These prescribed drinking water threats can only be significant drinking water threats under very specific circumstances, as established through the Clean Water Act and associated regulations.

Any land use or activity that is, or would be, a significant drinking water threat must conform with all applicable Source Protection Plan policies and, as such, may be prohibited, restricted or otherwise regulated by those policies despite any uses permitted by the zoning by-law. The SPP policies generally prohibit the establishment of new significant drinking water threats.
